**INDIAN JOURNAL OF NATUREL SCIENCES (IJONS)**  
**(BI-MONTHLY - PRINT)**

**POLICIES**

**OPEN ACCESS AND LICENSING**

Indian Journal of Natural Sciences is loyal to open access for academic/research work. All the original articles and review papers published in this journal are free to access immediately from the date of publication. We don't charge any fees for any reader to download articles and reviews for their own scholarly use. The Indian Journal of Natural Sciences also operates under the Creative Commons Licence CCBY- NC-ND 3.0 (Creative Commons Attribution-Non Commercial - No Derivs 3.0 Unported). This allows for the reproduction of articles, free of charge, for non-commercial use only and with the appropriate citation information. All authors publishing with the IJONS accept these as the terms of publication.

The full terms of the CC BY-NC-ND licence are incorporated below and may also be accessed here: [https://creativecommons.org/licenses/by-nc-nd/3.0/deed.en\\_US](https://creativecommons.org/licenses/by-nc-nd/3.0/deed.en_US)

**ETHICS**

**Policies on Ethics, Conflict of Interest, Human and Animal Rights, and Informed Consent**

**Ethics**

The publication of an article in a peer-reviewed journal is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of the work of the authors and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behaviour for all parties involved in the act of publishing: the author, the journal editor, the peer reviewer, the publisher and the society of society-owned or sponsored journals.

**Conflict of Interest**

Authors are required to disclose all sources of institutional, private and corporate financial support for their study. Donors of materials (for free or at a discount from current rates) should be named in the source of funding and their location (town, state/county, country) included. Other donors will be identified in the text. If no funding has been available other than that of the author's institution, this should be specified upon submission. Authors are also required to disclose any potential conflict of interest. These include financial interests (for example patent, ownership, stock ownership, consultancies, speaker's fee,) or provision of study materials by their manufacturer for free or at a discount from current rates. Author's conflict of interest (or information specifying the absence of conflicts of interest) and the sources of funding for the research will be published under a separate heading entitled "Conflict of Interest and Sources of Funding Statement". Any experiments involving animals must be demonstrated to be ethically acceptable and where relevant conform to national guidelines for animal usage in research.

**Human and Animal Rights**

Medicine, Radiology, Pathology and Surgery encourages authors submitting manuscripts reporting from a clinical trial to register the trials registries & bear a clinical trial registration number and name of the trial. Authors must state that the protocol for the research project has been approved by a suitably constituted Ethics Committee of the institution within which the work was undertaken and that it

conforms to the provisions of the Declaration of Helsinki. The Journal retains the right to reject any manuscript on the basis of unethical conduct of either human or animal studies. All investigations on human subjects must include a statement that the subject gave informed consent. Patient anonymity should be preserved. Photographs need to be cropped sufficiently to prevent human subjects being recognized or an eye bar should be used.

Reports of randomized clinical trials should present information on all major study elements, including the protocol, assignment of interventions (methods of randomization, concealment of allocation to treatment groups), and the method of masking (blinding), based on the CONSORT statement (Moher D, Schulz KF, Altman DG: The CONSORT Statement: Revised Recommendations for Improving the Quality of Reports of Parallel- Group Randomized Trials. Consent for Identifying Information if any identifying information is included in any part of the manuscript, you must obtain a written, informed consent from the patient and submit a copy of the document to the concerned Journal's Editorial Office.

### **PEER REVIEW (DOUBLE BLIND) POLICY**

We are committed to prompt evaluation and publication of fully accepted papers in IJONS. To maintain a high-quality publication, all submissions undergo a rigorous review process. Characteristics of the peer review process are as follows:

- ☐ Simultaneous submissions of the same manuscript to different journals will not be tolerated.
- ☐ Manuscripts with contents outside the scope will not be considered for review.
- ☐ Papers will be refereed by at least 2 experts as suggested by the editorial board.
- ☐ In addition, Editor(s) will have the option of seeking additional reviews when needed.  
Authors will be informed when Editor(s) decide further review is required.
- ☐ All publication decisions are made by the journal's Editor-in-Chief on the basis of the referees' reports.  
Authors of papers that are not accepted are notified promptly.
- ☐ All submitted manuscripts are treated as confidential documents. We expect our Board of Reviewing Editor(s) and reviewers to treat manuscripts as confidential material as well.
- ☐ Editor(s) and reviewers involved in the review process should disclose conflicts of interest resulting from direct competitive, collaborative, or other relationships with any of the authors, and remove oneself from cases in which such conflicts preclude an objective evaluation. Privileged information or ideas that are obtained through peer review must not be used for competitive gain.
- ☐ Our peer review process is confidential and identities of reviewers cannot be revealed.

### **PUBLICATION ETHICS AND MALPRACTICE STATEMENT**

#### **Section A: Publication and authorship**

All submitted papers are subject to strict peer-review process by at least two international reviewers that are experts in the area of the particular paper. Reviewers are being selected by Editor in Chief or the committee formed by Editor. Author also can propose reviewers for some journals and article types.

1. The factors that are taken into account in review are relevance, originality, readability, statistical validity and language.
2. The possible decisions include acceptance, minor revisions, major revision or rejection.

3. If authors are encouraged to revise and resubmit a submission, there is no guarantee that the revised submission will be accepted.
4. Rejected articles will not be re-reviewed.
5. The paper acceptance is constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism.
6. No research can be included in more than one publication, whether within the same journal or in another journal.

### **Section B: Authors' responsibilities**

1. Authors must certify that their manuscript is their original work.
2. Authors must certify that the manuscript has not previously been published elsewhere, or even submitted and been in reviewed in another journal.
3. Authors must participate in the peer review process and follow the comments.
4. Authors are obliged to provide retractions or corrections of mistakes.
5. All Authors mentioned in the paper must have significantly contributed to the research.
6. Level of their contribution also must be defined in the "Authors' Contributions" section of the article.
7. Authors must state that all data in the paper are real and authentic.
8. Authors must notify the Editors of any conflicts of interest.
9. Authors must identify all sources used in the creation of their manuscript.
10. Authors must report any errors they discover in their published paper to the Editors.
11. Authors must not use irrelevant sources that may help other researches/journals.
12. Authors cannot withdraw their articles within the review process or after submission, or they must pay the penalty defined by the publisher.

### **Section C: Peer review/responsibility for the reviewers**

1. Reviewers should keep all information regarding papers confidential and treat them as privileged information.
2. Reviews should be conducted objectively, with no personal criticism of the author. No self-knowledge of the author(s) must affect their comments and decision.
3. Reviewers should express their views clearly with supporting arguments in 500 to 1000 words.
4. Reviewers may identify relevant published work that has not been cited by the authors.
5. Reviewers should also call to the Editor in Chief's attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.
6. Reviewers should not review manuscripts in which they have conflicts of interest
7. resulting from competitive, collaborative, or other relationships or connections with
8. any of the authors, companies, or institutions connected to the papers.

### **Section D: Editorial responsibilities**

1. Editors (Associate Editors or Editor in Chief) have complete responsibility and authority to reject/accept an article.
2. Editors are responsible for the contents and overall quality of the publication.
3. Editors should always consider the needs of the authors and the readers when attempting to improve the publication.
4. Editors should guarantee the quality of the papers and the integrity of the academic record.
5. Editors should publish errata pages or make corrections when needed.
6. Editors should have a clear picture of a research's funding sources.
7. Editors should base their decisions solely on the papers' importance, originality, clarity and relevance to publication's scope.
8. Editors should not reverse their decisions nor overturn the ones of previous editors without serious reason.

9. Editors should preserve the anonymity of reviewers (in half blind peer review journals). Editors should ensure that all research material they publish conforms to international accepted ethical guidelines.
10. Editors should only accept a paper when reasonably certain.
11. Editors should act if they suspect misconduct, whether a paper is published or
12. unpublished, and make all reasonable attempts to persist in obtaining a resolution to the problem.
13. Editors should not reject papers based on suspicions; they should have proof of misconduct.
14. Editors should not allow any conflicts of interest between staff, authors, reviewers and board members.
15. Editors must not change their decision after submitting a decision (especially after reject or accept) unless they have a serious reason.

### **Section E: Publishing Ethics Issues**

1. All editorial members, reviewers and authors must confirm and obey rules defined by COPE.
2. Corresponding author is the main owner of the article so she/he can withdraw the article when it is incomplete (before entering the review process or when a revision is asked for).
3. Authors cannot make major changes in the article after acceptance without a serious reason.
4. All editorial members and authors must will to publish any kind of corrections honestly and completely.
5. Any notes of plagiarism, fraudulent data or any other kinds of fraud must be reported completely to COPE.

## **ANTI-PLAGIARISM POLICY**

**Indian Journal of Natural Sciences (IJONS)** regards plagiarism as a very serious offence. It is an illegal form of copying. Plagiarism is defined as the unacknowledged use of the work of others as if this were your own original work.

### **Examples of plagiarism**

- Copying and pasting from the Internet and posting somewhere else without proper citation
- Putting your name on another person's essay or project
- Copying exact wording from another person's text
- Using another person's photo, diagram, tables, sounds, or ideas without proper Citation
- Presenting research in your own words without providing references
- Purchasing another person's text and using it as your own
- Presenting ideas in the same format and order as your research source

### **By submitting paper for publication to the journal, Author(s) certify that:**

- I/We are fully aware that plagiarism is wrong
- I/We know that plagiarism is the use of another person's idea or published work and to pretend that it is one's own.
- I/ We declare that each contribution to your project from the work(s) of other peoples published works or unpublished sources have been acknowledged and source of information have been referenced.
- I/We certify that you are solely responsible for any incomplete reference that may remain in my/our work.

### **Anti-plagiarism declaration**

I have read and understood the IJONS rules on plagiarism. I hereby declare that this piece of written work is the result of my own independent scholarly work, and that in all cases material from the work of others (in books, articles, essays, dissertations, and on the internet) is acknowledged, and quotations and

paraphrases are clearly indicated. No material other than that listed has been used. This written work has not previously or not yet been published.

### **Tips for Avoiding Plagiarism**

- Learn the citation expectations for each course.
- When you take notes for a paper, be sure to cite sources so you don't get mixed up later.
- When you research online, be sure to find the original source of the information (Many Websites Plagiarize).
- If you are really worried, ask your prof. if you can submit a rough draft so she /he can check your citations.
- When in doubt, cite! It is better to have too many citations than few.

### **AI GENERATED CONTENT POLICY**

Indian Journal of Natural Sciences (IJONS) has an exacting policy on AI generated content in research manuscripts. Authors are instructed to ensure that the research manuscript which would submit for the publication should be unique and innovative. The publishers and editors are not responsible for any abuse and it is clearly announced that authors are fully responsible for their manuscript.

Authors are insisted to disclose the use of artificial intelligence (AI) tools in the preparation of manuscript. It should not be in the form of AI generated and assisted text, images, tables, graphs, data interpretation and language modifications. Failure to disclose AI assisted content will be deemed a violation of research ethics and your manuscript will not be considered for publication. The Journal does not validate the usage of AI contents in the manuscript and if the AI content would be identified in the manuscript, the authors are sole responsibility. It is informed that the AI tool will not be accepted as an author and it is clearly stated that authorship must be given only to the human contributors. All authors in the manuscript are insisted to acknowledge their involvement in the preparation of manuscript. The corresponding author must ensure that no AI generated contents in the manuscript and it is not represented for human work.

It is clearly instructed that the publisher and editorial board are not responsible for AI generated content in submitted manuscripts. The full responsibility of the corresponding author is to ensure that AI generated content does not include in factual inaccuracies, Biases, Plagiarism and data manipulation. Authors are sole responsible for any errors or misinformation arising from AI assistance. Indian Journal of Natural Sciences will not accept AI errors and it will be considered as an ethical violations.

#### **Immediate withdrawal**

If the manuscript is detected to hold undisclosed or unethical AI generated content, it will be immediately removed from the journal website, without any reconsideration.

#### **Author Suspension**

The authors are strictly instructed that if the violation of AI content will be found in the manuscript and it would be barred from publishing in the journal for one year. During this period, they will not be permitted to submit any manuscripts.

#### **Permanent Black listing of authors**

Repeated violations will results in permanent blacklisting for the authors from submitting manuscripts to IJONS.

## Editorial .....

The Editorial Board of the **Indian Journal of Natural Sciences (IJONS)** extends its warm greetings to our readers, authors, reviewers, scientists, educators, and research scholars. It is with immense pride that we acknowledge one of the most inspiring scientific achievements of the year—India's outstanding performance at the **56th International Physics Olympiad (IPhO) 2026**, where all five members of the

Indian team secured Gold Medals, placing India among the world's leading nations in physics education and scientific excellence. This remarkable accomplishment reflects the strength of India's scientific education system, the unwavering dedication of students, and the invaluable mentorship provided through the National Olympiad Programme.

On behalf of the **Indian Journal of Natural Sciences**, we convey our heartfelt congratulations to the five young Gold Medalists, their parents, teachers, mentors, the **Homi Bhabha Centre for Science Education (HBCSE)**, the **Tata Institute of Fundamental Research (TIFR)**, the **Department of Atomic Energy (DAE)**, the Olympiad coordinators, and every individual who contributed to this extraordinary national accomplishment. Their collective commitment has demonstrated that sustained investment in scientific education, talent identification, and mentorship can position India among the foremost scientific nations of the world.

Scientific excellence is not measured solely by international awards; rather, it is reflected in a nation's ability to cultivate curiosity, encourage critical thinking, promote evidence-based reasoning, and transform knowledge into meaningful innovations that benefit society. The success achieved at IPhO 2026 serves as a powerful reminder that India's future scientific leadership will depend upon our continuous commitment to strengthening research culture from the school level through higher education and beyond.

As India advances towards the vision of **Viksit Bharat 2047**, scientific research and technological innovation must become integral components of national development. Emerging fields including artificial intelligence, quantum science, biotechnology, climate science, renewable energy, advanced materials, space technology, precision agriculture, computational biology, and sustainable engineering demand highly skilled researchers capable of addressing increasingly complex global challenges. These disciplines require not only advanced infrastructure but also a vibrant ecosystem that nurtures creativity, interdisciplinary collaboration, ethical scientific practice, and lifelong learning.

Particular emphasis must be placed on empowering **young innovators** across the country. Today's school students represent tomorrow's researchers, inventors, entrepreneurs, and scientific leaders. Educational institutions should encourage inquiry-based learning, experimental science, innovation competitions, research internships, patent awareness programmes, startup incubation initiatives, and multidisciplinary project-based education.

*Young minds flourish when provided with opportunities to question established ideas, explore scientific problems, and develop practical solutions that contribute to sustainable national progress.*

*Equally important is the inclusion of **rural students** within India's expanding scientific ecosystem. Rural communities possess enormous intellectual potential that often remains underrepresented due to disparities in educational infrastructure and access to advanced scientific resources. Establishing district-level research laboratories, rural innovation hubs, mobile science laboratories, digital learning platforms, community science centres, and mentorship networks can significantly enhance scientific participation among students from underserved regions. Scientific opportunity should never be determined by geography; every talented student deserves access to quality research education irrespective of socioeconomic background.*

*The research community also bears an important responsibility in promoting scientific literacy and responsible innovation. High-quality scientific publications provide not only validated knowledge but also inspiration for future investigations. Journals serve as permanent repositories of scientific progress, fostering collaboration across disciplines and connecting researchers worldwide. Rigorous peer review, research integrity, reproducibility, transparency, and ethical publication practices remain fundamental pillars of scientific advancement and public trust.*

*The **Indian Journal of Natural Sciences** remains steadfast in its commitment to promoting excellence in multidisciplinary scientific research. We continue to encourage the publication of original investigations, innovative methodologies, interdisciplinary collaborations, review articles, case studies, and emerging technologies that address regional, national, and global scientific challenges. We particularly welcome contributions that bridge the gap between fundamental research and societal applications, encouraging innovations that improve environmental sustainability, healthcare, agriculture, biodiversity conservation, energy security, and technological development.*

*We also strongly advocate greater participation of undergraduate students, postgraduate scholars, doctoral researchers, early-career scientists, and young faculty members in scholarly publication. Scientific writing, research communication, and international collaboration are essential components of modern research careers, and journals play a pivotal role in mentoring emerging researchers through constructive peer review and dissemination of quality science.*

*The remarkable achievement of India's young physicists should inspire every educational institution to invest further in scientific talent development. It should encourage policymakers to strengthen research infrastructure, motivate educators to cultivate scientific curiosity, inspire parents to support inquiry-driven learning, and empower students to pursue careers in science with confidence and determination. Scientific progress is ultimately a collective national endeavour that flourishes through collaboration among government, academia, research institutions, industry, and society.*

*As Editor-in-Chief, I sincerely congratulate the distinguished medal winners, their families, dedicated teachers, scientific mentors, HBCSE, TIFR, the Department of Atomic Energy, and all supporting institutions for bringing immense pride to our nation. May this extraordinary achievement inspire millions of young Indians to embrace scientific inquiry, pursue research with integrity, and contribute innovative solutions for the advancement of humanity.*

*The Editorial Board of the **Indian Journal of Natural Sciences** reaffirms its unwavering commitment to promoting scientific excellence, encouraging responsible research, supporting young innovators, empowering rural scientific talent, and providing a global platform for impactful scientific discoveries. Together, let us strengthen India's research ecosystem and build a scientifically enlightened, innovation-driven, and sustainable future for generations to come.*
